# Spa Clean Program

Sum-R-Fun Pool Products, Inc. spa service division is now offering programs to help simplify your spa maintenance and free up your time to relax and enjoy your spa.

It is recommended to drain and refill a spa/hot tub twice per year to ensure a soft refreshing feel of the water. Spa/hot tub water over time becomes "hard" due to chemicals and minerals that are left behind as the pure water leaves the spa through evaporation "steam." When you top off the spa with fresh water the cycle starts again. Chemical byproducts and minerals in the water never leave the water which causes a build up and makes the water "hard." This leads to a less refreshing feel to the water and discolored foaming when agitated or aerated in full spa mode.

We have 3 spa clean options available that include Natural Chemistry enzyme technologies that break organic contaminants leaving behind sparkling water with fresh and clean surfaces.

In addition to the Spa Clean Programs, we also offer weekly, Bimonthly, or monthly services to vacuum, skim, and maintain chemicals on your spa. We carry a full line of spa chemicals that can be delivered to you during one of the services or free delivery at any time. (Note: Delivery with no service will incure a small fuel surcharge.)

- Programs are listed on following page -

1941 Kirkwood Highway Newark, DE 19711 (302) 368-7201

651 Naamans Road Northtowne Plaza Claymont, DE 19703 (302) 792-2731

# **Spa Clean Options**

To achieve the finest water quality, it is recommended to perform one of these services 2 times per year; November (for holidays) and July or February/March and August. You can mix up the services, (examples: Ultimate spa clean -- December, Standard spa clean -- July) or any combination you desire. You can also schedule any cleaning at anytime. We also offer weekly, monthly, or bi-monthly maintenance plans (please call our offices for details.)

\*\* Note: \*\* If you schedule any 2 services you can deduct 10%. Please place a check mark under the packages that you choose and next to the time frames you would prefer.
